CSCP 5-Year Plan

2024 - 2028

Mission Statement

To encourage and continually foster the evolution of Clinical Perfusion through advocacy, education and certification, optimizing patient care.

Strategic Goals

Membership

- Revise CSCP membership benefits, ensuring members' needs are met as professionals and lifelong learners.
- Continue offering professional development opportunities for members.
- Provide Journal access and other educational resources.
- Carry out regular surveys to examine short and long-term trends while gaining deeper insight into membership demographics.
- Maintain a process for Internationally Educated perfusionists to be certified by the CSCP.
- Facilitate an improved recertification process that continues to meet the needs of the membership.

Strategic Goals

Certification Exam Maintenance

- Oversee the exam at arm's length and encourage continued evolution of the strength of the exam processes.
- Work toward making the exam revenue-neutral to ensure the sustainability of the process and longevity of the certification assessment tool.

Strategic Goals

Professional Community

- Continue a sustainable conference model that meets the profession's evolving needs.
- Strive for collaborations with other healthcare professional societies and highlight the collaborations that we currently have.
- Strengthen connections between local departments and national opportunities/initiatives.
- Support growth and best practice adoption in emerging and evolving areas of practice.

Strategic Goals

Advocacy

- Commitment to fostering an inclusive and empowering environment for our diverse membership.
- Support to Canadian schools advocating a Master's in Perfusion degree.
- Advocacy to all members for equality across the country, regardless of province of employment.
- Research opportunities to engage with health authorities to highlight the role of clinical perfusionists in the healthcare system and emphasize the importance of Canadian certification.
- Facilitate more facetime with the academic partners through involvement in advisory committees, presentations, informative talks, and student interaction.

Strategic Goals

Regulation

- Partner with any province as they enter into ongoing regulation discussions.
- Maintain up-to-date standards of practice of clinical perfusion.
- Maintain a certification status for all perfusionists in Canada through partnership if provinces become regulated.

Operational Considerations

- Continue to maintain and improve the website to ensure recertification and effective communication with the membership and the public.
- Develop and maintain a succession planning process for continued strong office management.
- Strengthen revenue streams.
